- Footer: Copyright, Quick links

GRID

1 Nav Bar
93px high. Remains on everypage.

2 Title Spacing
27px high. Each section title is the same spacing away from the row above them.

3 Schedule Boxes
151px by 86px. Each take up 4 columns worth of space.

4 Header and Footer
67px high. Consistant on every page.

5 Time
Hight between each shown time is 49px. The reason for that amouth of space is for a user to imagine the missing time in between. The objective being that the user would easily know where the missing time would go, and still get the point, without adding the extra number.

6 Row Width
All rows are the same width, which take up the entire page. I think this gives it a less boxy look.

7 Date
45px by 41px. Centered over the schedule boxes.
